
We Built Mbinudita School

Project Report
August - December 2020

Executive Summary

The Mbinudita school located in sub-district Ngara Ori Angu, East Sumba was destroyed in December 2019 is an obligation to rebuild again. The future of education activities here must have a safe place to continue and improve. Kawan Baik Indonesia Foundation and Fair Future Foundation have initiated rebuilding the school in January 2020. We're invited several participants and the local communities to join as our reconstruction partners.

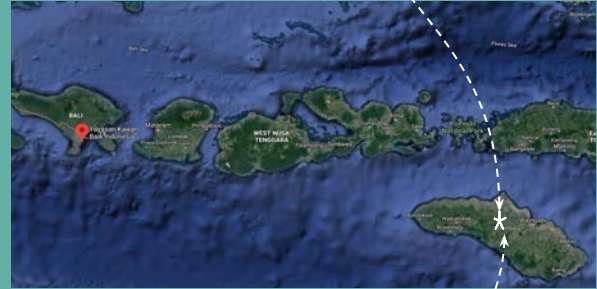

The data were collected and show us, Mbinudita not only needs an education place. The deeper we found, basic needs are the most population demands here. Rebuilding Mbinudita entirely or "Bangun Mbinudita" became our buzzword and purpose in this project. Education is the first step to empowerment any aspect in this rural area. The enthusiasm from all participants, which set off our power to assemble the school again. We all believe people receive good education can change their future.

This report is made to summarise the final phase of the Mbinudita School project located in East Sumba, physical building, and legal segments. The project's budget is CHF48,594.34 allocated for materials, transport, installation, operational, labor, and operations. However, the ceremony for the hand over from the Foundations to local department is pending since the furniture and other small finishing is under completion.

Foundation statement

The Mbinudita project is a disaster response action after the school was collapsed in December 2019, the delay of the launch are raised new problems in the education sector and became urgently matter to solve.

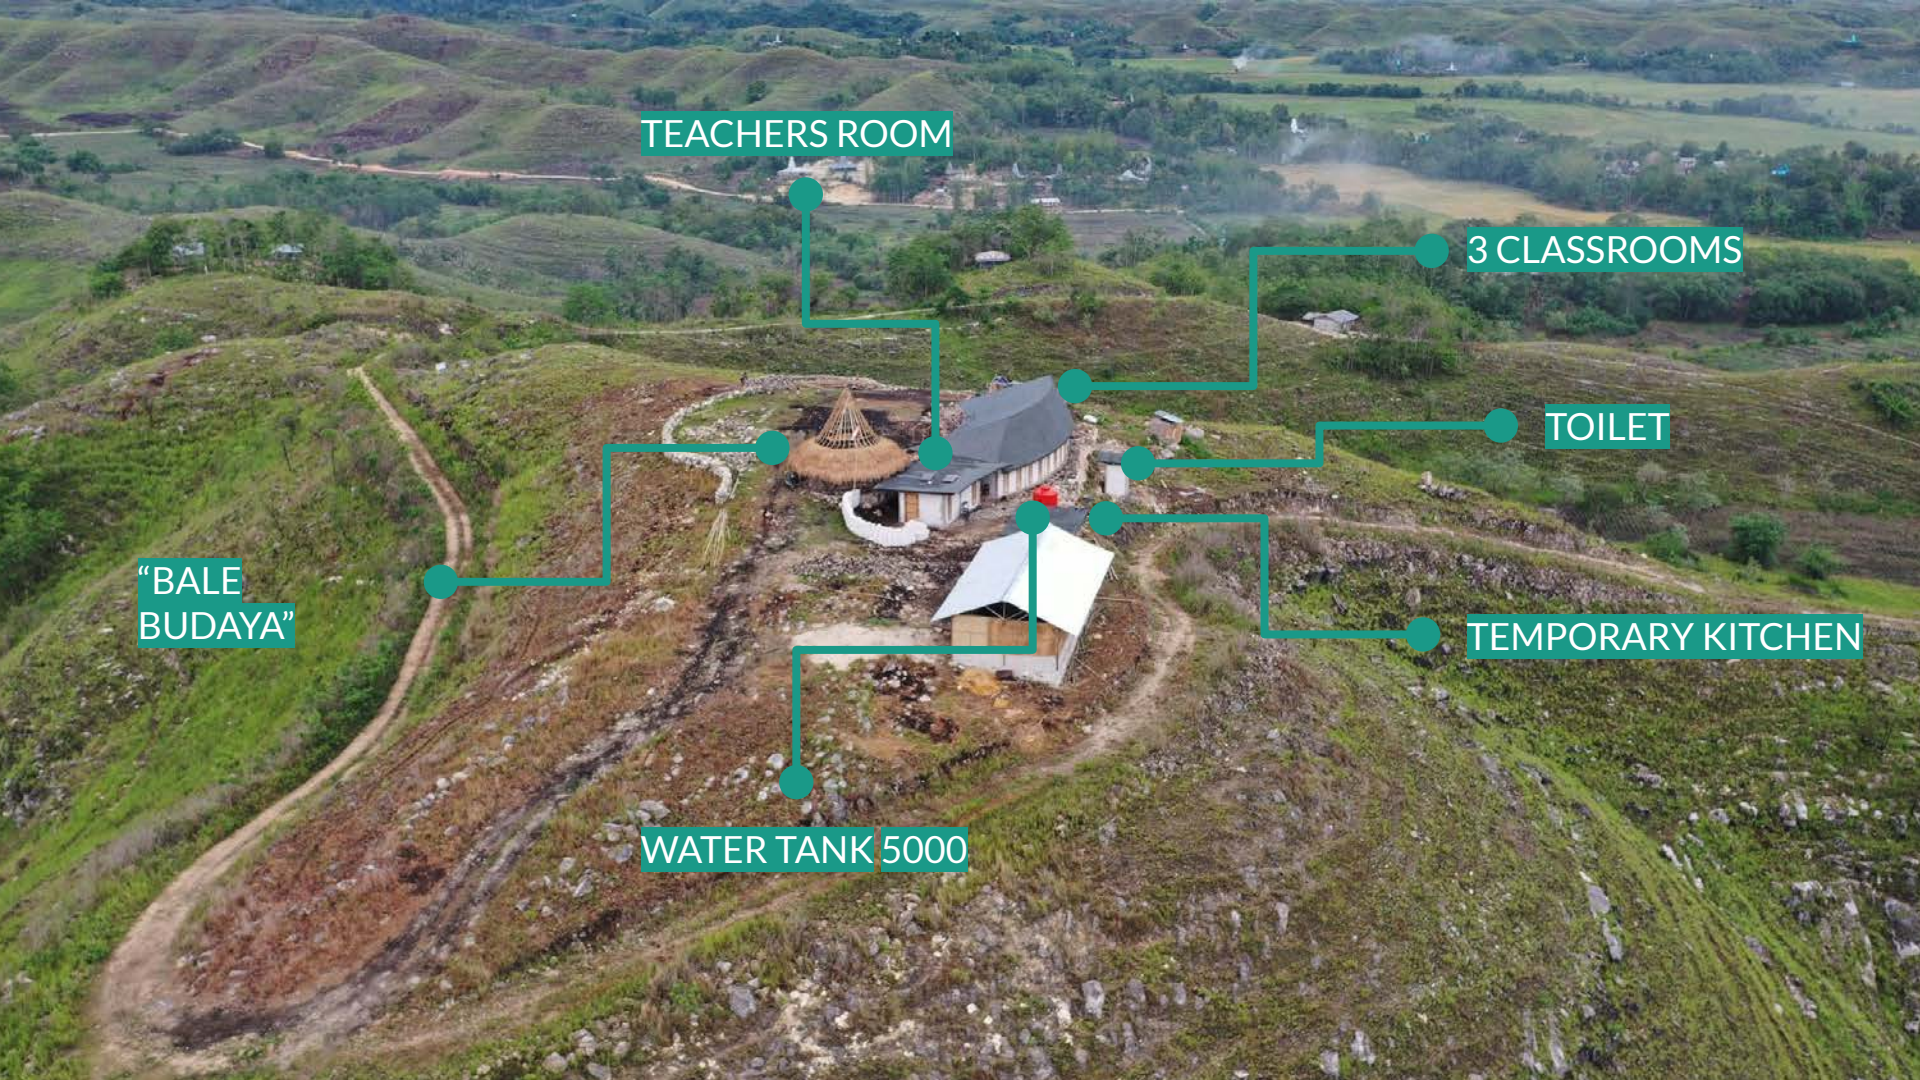

The Foundations and Participants are committed to reconstruct and the building is now stand up the hill of Mbinudita village.

Together, we give a hand to the future we want!

Project Risks:

1. Lack of skilled expertises - “Pass”
2. Lack of infrastructure and facilities - “Pass”
3. Lack of sources (material and tools) - “Pass”

These issues were potentially affected the budget overruns and delayed timeline. However, the team effort in the field was able to avoid the potential risk by the right strategies.

TEACHERS ROOM

3 CLASSROOMS

TEMPORARY KITCHEN

"BALE BUDAYA"

WATER TANK 5000

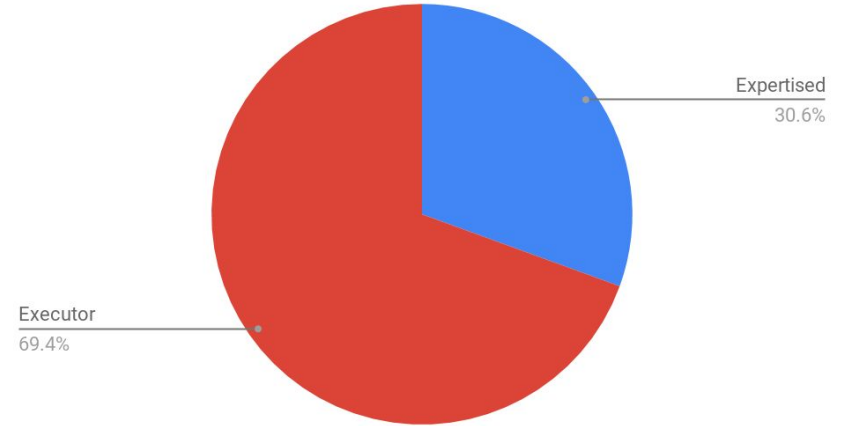

Supporting information

01

Lack of Skilled Expertises

The school construction process was completed on time, with support from the local community. Even with limited expertise, the community was enthusiastic to participate. This is very helpful for experts.

Expertises

Supporting information

02

Lack of Infrastructure; Transport, Power Supply and Water

Lack of Facility; Building and Equipment

The challenges regarding transportation, electricity and water can be resolved with the support of multi stakeholders; Local government, personal, and other local institutions.

Transport, water, & power
power supply

Facilities

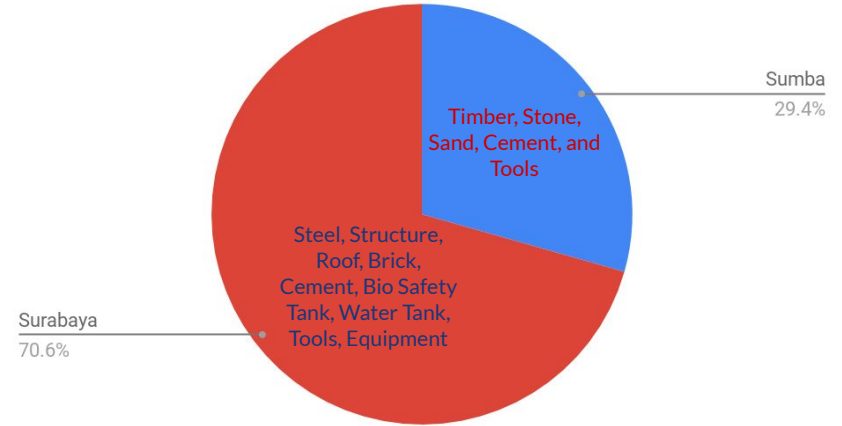

Supporting information

03

Lack of Sources

Raw materials to support building construction following technical drawings cannot be provided in Sumba. So it must be imported from Bali and Surabaya, but the complementary raw materials can still be met from local sources.

Materials Sources

What next?

- “Bangun Mbinudita” or Built Mbinudita School interior will be suits with the furnitures such as Tables, Chairs for the classroom from.
- The school exterior will be finished with additional landscaping garden, painting the wall and school sign board.
- Additional facilities to supply electricity, we will added quantities of photovoltaic panel.
- Additional facilities to supply water, we will combine with other project to build a well.
